

# ENVIRONMENTAL POLICY

ASCARRIER, being the market leader in Turkey in the product category, in line with its vision of gaining a place in the world market, in order to improve the environmental management system in accordance with its purpose and context within the scope of the environment, to reduce the environmental impact of its activities and to increase its environmental management performance;

**Complementarity:** It manages environmental dimensions and responsibilities with a systematic approach by taking into account the life cycle and in this context;

- Legal requirements, customer requirements and our compliance obligations will be fulfilled,
- To continue training activities in order to increase the environmental knowledge and awareness of our employees,
- We are committed to achieving environmental goals by keeping environmental aspects under control.

**Sustainable Growth:** The organisation is committed to minimise its environmental impact by using its resources efficiently while preparing production projects and to continuously improve its environmental management systems to increase its environmental performance.

**Natural Resources and Waste:** We ensure that natural resources are protected and wastes are minimised at source, reused and recycled when possible, and that unusable wastes are disposed of by appropriate methods.

**Climate Change:** We continue to use renewable resources for CO2 neutral production without harming the ecological balance and expect the same care from our suppliers.

**Environment and Health:** In case of any accident or emergency that may occur during our activities, we plan measures to minimise environmental damages at the beginning of the project. We are committed to protecting the environment by preventing pollution.
