

## ENVIRONMENTAL SCOPE

The scope of ASCarrier Automotive Industry and Trade Limited Company is to produce "Metal Compression Profile".

ASCarrier Otomotiv is located at coordinates 40°47'17.9"N 31°08'58.8"E in Beyköy, Düzce province and its neighbours are ASD Laminate and Aytteks Tekstil companies and there are no schools, hospitals, etc. institutions nearby due to its location within the organised industrial area. It has a closed area of 1970 m<sup>2</sup> on a total area of 10003 m<sup>2</sup>. It is located in the plain due to its geographical location. In addition to the Black Sea climate in Düzce province, it also shows a transition between Mediterranean and continental climates. It is hotter in summer and a little colder in winter.

Our company, which has a zero waste certificate and implements waste management, collects its production and non-production wastes in defined places and delivers them to licensed recycling companies. With the materials used in its production being recyclable materials, it contributes to both the environment and energy saving.

It is exempt from environmental permits as well as being out of the scope of EIA.

Electricity is supplied by solar panels and DOSB.

Natural gas is supplied by private distribution companies.

Domestic wastes are collected by DOSB.

Transportation to the factory is provided by company shuttles, private vehicles and public transport.

ASCarrier has clarified the physical and managerial boundaries of the implemented environmental management system. However, within the life cycle approach; it evaluates the control and impact it can apply on activities, products and services.
